

AJAY KRISHNAN K

AI & ML Engineer (Fresher) | Mobile Developer | Full-Stack Learner
+91 9446573142 | ajaykrishnank2024@gmail.com | github.com/ajaykrishnank2006 | Palakkad, Kerala

PROFESSIONAL SUMMARY

Enthusiastic AI & Machine Learning Engineer with a strong foundation in intelligent systems and data-driven models. Proficient in Python, machine learning algorithms, and prompt engineering for real-world applications. Experienced in building mobile applications with Flutter and Firebase, and applying modern AI tools to streamline workflows. Passionate about emerging technologies and committed to delivering scalable, impactful solutions through continuous learning.

INTERNSHIP EXPERIENCE

AI/ML Intern — Linkmein Technologies Pvt. Ltd, Hyderabad

May 2025 – June 2025

- Engineered and deployed ML models for real-world classification tasks, reducing manual verification time by ~40%
- Implemented feature extraction and classification techniques to distinguish genuine from forged signatures with over 90% accuracy
- Applied ML algorithms to strengthen authentication security, resulting in a 30% improvement in fraud detection reliability
- Collaborated in a cross-functional team of 4, participating in code reviews, testing, and technical documentation

PROJECTS

Smart Study Assistant

Flutter • Firebase • OpenAI API • Riverpod • go router

- Launched a full production-ready AI-powered study assistant app as a solo developer, delivering 3 core AI features
- Integrated OpenAI API for intelligent Q&A, summarization, and personalized study plan generation
- Configured Firebase Auth, Firestore, and Storage with Riverpod state management for a scalable architecture supporting 100+ concurrent sessions

Real-Time Sign Language Detection

Python • MediaPipe • OpenCV • Random Forest

- Created a real-time hand gesture recognition system to convert sign language into readable text
- Leveraged MediaPipe and OpenCV for hand landmark detection, processing 30+ frames per second
- Trained a Random Forest classifier achieving ~92% accuracy on test data

Digital Signature Verification for Fraud Prevention

Python • Machine Learning • Image Processing

- Constructed an ML-based system to verify handwritten signatures and detect forgeries
- Extracted and analyzed signature features using image processing, achieving high classification precision
- Optimized the model to strengthen fraud prevention in digital financial transactions

EDUCATION

Diploma in Engineering — Artificial Intelligence and Machine Learning

Malabar Polytechnic Campus, Cherpulassery, Palakkad, Kerala | 2024 – Present

- Core subjects: Machine Learning, Deep Learning, Python Programming, Data Structures, Statistics
- Relevant coursework: Neural Networks, Natural Language Processing, Computer Vision

Higher Secondary (+2) — Computer Science

Cherpulassery, Palakkad, Kerala | 2023 – 2026

TECHNICAL SKILLS

Languages	Python, C, Java, Dart, JavaScript (ES6+)
AI / ML	TensorFlow, scikit-learn, OpenCV, NumPy, Pandas, Matplotlib, Seaborn, OpenAI API, Prompt Engineering

Mobile Dev	Flutter, Android (Java), Firebase (Auth, Firestore, Storage), Riverpod, go router
Web Dev	React (learning), HTML5, CSS3, Node.js (basics)
Databases	Firebase Firestore, DBMS
Tools	Android Studio, VS Code, Antigravity, OpenAI Codex, Google AI Studio

CERTIFICATIONS & LEARNING

- Prompt Engineering – Zero-shot, Few-shot, Chain-of-Thought, RAG techniques (self-study)
- The Odin Project – JavaScript & Web Development Fundamentals (in progress)
- FreeCodeCamp – Responsive Web Design & JavaScript Algorithms (in progress)
- Flutter & Firebase – Hands-on project-based learning via official documentation and YouTube

LANGUAGES

Malayalam: Native **English:** Professional working proficiency (actively improving) **Hindi:** Basic

INTERESTS

AI/ML Research • Mobile App Development • Prompt Engineering • Open Source • Malayalam Music
